March 6, 1973

again, so the motion is to bring the bill back.

SPEAKER: Is there any further discussion of the motion, Senator Waldron, did you wish to be heard on the motion?

SENATOR WALDRON: Mr. President and members of the legislature, I would ask the legislature to bring this bill back from the Governor and adopt these amendments, whether you are for the bill or not, because we have passed it twice. It appears to me that Senator Chambers is not getting the type of support from the bill drafter and the people that really could be reviewing these bills, before they're finally passed that is necessary. I think this is one of the weaknesses in this legislature is that when we draft the amendment and when we have the bill drafted originally, the bill drafter's office does not spend enough time with these bills and look into the details of them, because I think this is something that could have been prevented by a, better staff work, and of course some of you will say the Senator is responsible for this, but as you well know in each of your bills and as well as in my own bills, it is difficult for me to know how each one of the little provisions in the bill is going to affect the overall picture in the whole statute, so I think this is a failing of the system that we have here and our poor staff in which Senator Carpenter and others I know are trying to increase rapidly and more professionalized and I hope we can be able to do this to prevent this reoccurrence, so I would ask that we just return this bill without further discussion because we have agreed to pass it in the past, and I think it is only fair to do so.

SPEAKER: The Chair recognizes Senator Carpenter.

SENATOR CARPENTER: I was with Senator Chambers when he talked to the Governor yesterday, by accident, and, I was there on another matter, and Senator Chambers came in after that, now what the Governor said in no uncertain terms, he said I'm going to sign this bill if you'll correct the things that obviously ought to be corrected. He was in a position if he signed this bill, with an opinion of the Attorney General that there was some question what it meant, insofar as he was concerned, he was in the position of trying to sign a bill in which he had been advised it was ineffective until it had been amended. In any case it wouldn't have been effective until 1977 as I understand it. Now if I can understand the English language, sometimes I don't, I can assure you although I'm not speaking for the Governor, from what I heard him say to Senator Chambers myself, if you will correct this bill, and the bill is in proper form so it will do what the intent of the bill is, mean not effective before 1977, he'll sign it.

SPEAKER: The Chair recognizes Senator Stahmer.

SENATOR STAHMER: Mr. President and members of the body, I'd like to point out that in my first year in this Senate that I did have a bill brought up that was on the Governor's desk, this is a speedy trial bill, and he had the Attorney General look it over, and they recommended it be brought back and reworded to include the model penal code statute for speedy trials which was done and then was upheld in the state supreme court and I'm very glad that this process did happen, but I'd like to call something to the attention of the executive board of this body, if I could, because Senator Waldron I think, touched on a very interesting subject, when he said many bills are drafted in haste, and I have great faith in our bill drafters but it has been pointed out to me that our bill drafters are allowed to work in their off hours by retainer for other people, and I think they ought to be working one hundred percent of the time for the state of Nebraska, and I
